# BITUMASTIC

REG. U.S. PAT. OFF.

## ENAMEL

FOR PERMANENT PROTECTION  
OF YOUR OIL AND NATURAL  
GAS LINES

For more than forty years, BITUMASTIC ENAMEL has been establishing world's records in the anti-corrosive protection of steel. In the last ten years it has been applied to full 90% of the important steel water supply systems laid in this country and has also been used to protect hundreds of miles of oil and natural gas lines, proving particularly valuable where these lines are laid in marshy or corrosive soil. One such line, examined after eleven years, was found in excellent condition while other lines, coated with other materials and laid in the same region, were twice lifted and recoated in the same period. Full details will be found in our 54-page book "The Protection of Pipe Lines" sent to engineers and executives on request.

In February, 1926, Humphreys purchased the remaining half interest in three tracts at Barbers Hill dome in Chambers county from Mills Bennett Production Co. for a consideration of \$350,000 and a one-tenth of the net profits to come from the land. The buying company also obligated itself to spend \$250,000 within the near future on the acreage bought. Humphreys Corp. held a half interest in the acreage formerly. The acreage includes 121 acres on the Kirby "B" tract east of the dome and 73 acres each in a Kirby tract and Barber tract on the northwest side of the dome. At the time of the deal the acreage had around 200 bbls. daily production. Since the deal was closed Humphreys completed the Kirby B-2 well, a workover, flowing 20 bbls. an hour after being deepened from 4,119 to 4,171 ft. The well, completed originally by Mills Bennett Production Co. in 1926 made 200 bbls. on the pump at that time but failed to flow from that depth.

**TEXAS PACIFIC LAND TRUST**, 11 Pine st., New York, N. Y. *Trustees*: David Rumsey, chm., and Alfonse Kloh, field supt.; Preston G. Northrup, San Angelo, Tex. *Capital*: As of Jan. 1, 1927, 19,290 full certificates of \$100 par were issued. For convenience in trading, each certificate has been split up 100 for 1, so that 1,929,000 sub share certificates are now outstanding (Jan. 1, 1927). These certificates are represented by 1,954,793 acres in various parts of Texas, equivalent to more than 1 acre for each sub share certificate. The Trust was formed in 1888 to take over about 3,450,647 a. of land. Originally 103,700 full share certificates (10,370,000 sub shares) were issued against the land. From year to year since 1900 sales of land at varying prices have enabled the Trust to retire certificates by purchase as funds became available. Average price per acre obtained in 1926 was \$6.85 against \$5.55 in 1925, \$9.17 in 1924, \$9.35 in 1923, \$5.70 in 1922, \$5.88 in 1921, and \$6.77 in 1920. Sales in 1900 averaged \$2.37 an acre. No dividends are paid by the trust, the ultimate object of which is gradual retirement of certificates, and liquidation. The trustees have full

power to sell, lease, improve or encumber properties, or to purchase other lands. Due to the activity of oil interests in West Texas, all current sales of the land are made with reservation of mineral rights. Among the companies which have leased acreage for oil development are: Humble, Magnolia, Deep Rock Oil, Gulf Production, Skelly, The California Co., Texas Exploration, Marland and Pure Oil. Tests for potash are also being made on the trust's holdings in Midland co. Companies holdings are in following Texas counties: Brewster, Callahan, Coke, Crane, Culberson, Edwards, Ector, El Paso, Fisher, Glasscock, Howard, Hudspeth, Irion, Jeff Davis, Kent, Loving, Martin, Midland, Mitchell, Nolan, Palo Pinto, Pecos, Presidio, Reagan, Red River, Reeves, Stephens, Sterling, Taylor, Upton, Winkler. In 1926 Company received in rentals \$87,269.52; oil and mineral income, \$300,988.01; land and town lot sales, \$8,549.85; other income, such as interest, bills rec., easements for pipe lines, etc. brought total receipts, with last year's cash on hand, to \$651,117.85. Cash on hand Dec. 31, 1926, \$362,928.11. General taxes in 1926, \$56,605; income taxes, \$34,067; general expense, \$30,767; com. to selling agents, \$25,189; surveys, \$9,771; 206 certificates purchased at \$577.58 each, \$118,981.70. On Jan. 5, 1927, following Advisory Committee of Certificate Holders was formed to advise with and assist the trustees: G. W. Davison, P. Baerwald and G. C. Fraser.

All of the capital stock of the Texon Oil & Land Co., (of Tex.),

consisting of 1000 shs. of com. stock of \$100 par value; B. 1173½ shs. of the capital stock of Group No. 1 Oil Corp., a Delaware corporation, having a capital stock of 2048 shs. of com. stock of no par value. Right to acquire an additional 113 shares of the capital stock of Group No. 1 Oil Corp. upon payment of \$3,000 per sh. (Option subsequently exercised and Texon now owns 1286½ shs. of Group One); C. 287,449 shs. of the capital stock of Group No. 2 Oil Corp., a Delaware corporation, consisting of 485,000 shs. of com. stock of \$1 par value; D. 18,750 shares of the capital stock of Big Lake Oil Co., a Delaware corporation, having a capital stock of 400,000 shs. of com. stock of \$10 par value; E. Oil and gas lease affecting 7½ a. out of Section 10-16-16 Union co., Ark. F. Reagan co., Purchasing Co. Practically all of the productive property in which Texon is interested consists of leases on University of Texas lands in Reagan co., Tex. Originally about 64 sections of such land were held by Texon Oil & Land Co. After the discovery of oil on the property in 1923 a deal was made with the Big Lake Oil Co., under the terms of which Big Lake received a sub-lease on 13 sections of Texon co.'s land in return for a cash payment and a percentage of the stock. In this deal Group No. 1 Oil Corp., which had in the meantime been organized by interests identified with Texon, transferred 13 sections of its holdings to Big Lake and received 13/64ths of the Big Lake Company's stock. Texon transferred 3 sections and received 3/64th of Big Lake stocks. Texon's holdings as of Jan. 21, 1926, consisted also of approx. 62% interest in Group 1 and controlling interest in Group 2 corp.; oil and gas leases for ten years subject to renewals on 29 sections, University lands, Reagan co., Texas; oil and gas five year permits to State University lands in the same co.; and several scattering leases in Burkburnett, Tex., and in Wichita co., Tex. Has purchased Kimberlin interest and is now the sole owner of section 55, block 1, Pecos co., Tex., giving it 640 a. 1 gas well, 2,000,000 to 3,000,000 cu. ft. of gas. daily. *Dividends:* Texon declared several 5% quarterly dividends in 1925, and for the first quarter of 1926, declared 5% regular and 15% extra. Now paying 20% quarterly. Group 1 declared five dividends of \$200 each and one of \$225, in 1925. Now pays \$750 a sh. quarterly. Big Lake Oil Co. paid 17½c. a sh. in Jan. and Feb. and 25c. a sh. in Mar., 1926. Now pays 17½c. a sh. quarterly. Texon Oil & Land Co. of Del.; Group No. 1 Oil Corporation, Group No. 2 and Big Lake Co. are to receive 49% of the com. stock of the Reagan Co. Pur. Co., Inc., to be divided between Texon, Group 1 and Group 2, on one hand, and Big Lake on the other, the exact division to be determined by the quantity of oil delivered to the purchasing company, under the contract between Dec. 1, 1925, and Dec. 1, 1926. On Nov. 12, 1925, as the outcome of litigation instituted by several groups of stock holders, Judge P. R. Price, of the State District Court of El Paso Co., Texas, handed down a decree establishing the status of the co. This decree validated 400,000 shs. of Texon stock, property of G. A. Loomis & Co.; 2,400,000 shs. of Texon stock issued to Carl G. Cromwell, were also validated, making the total valid outstdg. stock 4,386,150 shs. It was further ordered that Texon exercise within 60 days an option to purchase 113 shs. of Group 1 stock at \$3,000 a sh., in accordance with a previous decree entered in the United States District Court of Delaware. The Delaware court decree had also ordered that 512 shs. of Group 1 stock originally allotted to certain individuals be turned back to the Texon Co. without cost. The Texas court decree further stipulated that Texon pay a stock dividend of 10% to all stockholders, except upon 1,400,000 shs. in the name of Cromwell and 400,000 shs. in the name of G. A. Loomis, and upon the latter 1,800,000 shs., a stock dividend be paid at the rate of 3½%. The carrying out of this decree added 318,615 shs. to Texon's outstdg. capital stock, making the total amount 4,704,765 shares. Finally the court ordered a cash dividend of not less than 6% paid to stockholders; it being stipulated that the 1,400,000 shs. in the name of Cromwell, should receive 6c. per share less than paid to other stockholders, and the 400,000 shares belonging to Loomis and registered in the name of Levy Bros., should receive 3c. per sh. less than paid to other stockholders. These cash and stock dividends were paid shortly after the decree was entered.

# Petroleum Refineries in United States

## Arranged Alphabetically by States

THIS tabular compilation comprises a complete list of the petroleum refineries in the United States, as reported by G. R. Hopkins, petroleum economist of the U. S. Bureau of Mines. This table shows 465 refineries in the country as of January 1, 1927, having an aggregate daily capacity of 3,061,007 bbls. These totals compare with 510 refineries of 2,852,967 bbls. capacity on the same date in 1926 and with 541 refineries of 2,827,837 bbls. capacity on January 1, 1925. Of the total number of plants in the table, 271 with an aggregate daily capacity of 797,682 bbls. are skimming plants making gasoline, kerosene and gas and fuel oils. Of the remaining capacity, the greater part is that of complete plants, of which approximately 170 have cracking equipment, the total charging capacity of these being in excess of 1,992,000 bbls. daily. The greatest number of refineries are located in Texas, which has 93 with a capacity of 577,430 bbls., while California is second as to number of plants, having 77, though these have a greater refining capacity, namely, 841,650 bbls. daily.

For the convenience of traffic managers and others who require shipping information, THE PETROLEUM REGISTER has prepared an accurate statement of the railroad connections of each refinery, the railroads indicated being in the majority of instances named by officials of the several refineries as their usual shipping affiliations.

Types of refineries are indicated by the following abbreviations:

Comp.—Complete plant.

Top.—Topping plant.

Skim.—Skimming plant.

S. & A.—Skimming and asphalt.

S. & L.—Skimming and lubricating oil.

S. L. A.—Skimming, lubricating and asphalt.

Asph.—Asphalt.

Lub.—Lubricating oil.

Wax—Wax making plant.

Crack.—Cracking plant.

\*—Indicating plant has cracking equipment.

## Natural Gasoline Plants

The following compilation contains a list of the natural gasoline absorption and compression plants in the states of Arkansas, California, Illinois, Kansas, Kentucky, Louisiana, New York, Ohio, Oklahoma, Pennsylvania, Texas, West Virginia and Wyoming. For all of the states, except California and Wyoming, the list has been compiled as a "traffic guide," showing the loading point locations, the daily output and the railroad connections. Where the company is not listed in the text, reliable information was unavailable.

In western part of concession where this field is located, company has retained under its own management some 800,000 a. Eastern part of concession is being developed under contract by Standard Oil Co. (N. J.), B. C. O. to receive royalty on oil prod. Central part of concession is controlled under contract by Anglo-Venezuelan Oil Trust, which in turn leased the acreage to Standard of N. J. under drilling contracts. B. C. O. owns stock interest in the Anglo-Venezuelan Oil Trust and also receives an overriding royalty. The El Mene field is at present making about 8000 bbls. daily. Standard of N. J. has drilled several wells in its part of concession, but without favorable result. Standard is continuing prospecting and it is believed that the chances for opening up prod. territory are good. B. C. O. oil from the El Mene field is tied up with a contract with the Royal Dutch. This contract calls for purchases of all El Mene oil up to 20,000 bbls. a day.

(Gulf Oil Corp.) and 30 concessions of approx. 10,000 hectares (Note: A hectare is 2.471 acres) each in the District of Roscio, Venezuela, also 13 concessions in Guarico, Venezuela, totalling 118,082 hectares. Foregoing properties including the concessions in Maracaibo Basin being developed by Venezuelan Gulf Oil Corp. were until the summer of 1926 the principle holdings of Creole Syndicate. That time Creole purchased for \$600,000 cash and 259,145 shares of Creole stock, all of the preferred stock and 99% of the common stock of Condor Oil Co. of Venezuela. This purchase gave Creole 20 concessions in the district of Perija containing 10,000 hectares each, 4 concessions in Monagas of 10,000 hectares each and 12 concessions in Zaraza, containing 118,000 hectares. Richmond Petroleum Co. Venezuela (Standard Oil of California) has a contract to drill some of the latter acreage for the Creole, on a working interest. Creole also in 1926 acquired the Webster Syndicate, a Delaware Corp. owning 2 concessions in Monagas, Venezuela, containing 24,000 hectares. Venezuelan Gulf has been producing oil regularly since 1925 from the Creole's Michigan and Superior concessions along the eastern shore of Lake Maracaibo, extending about 5/8 of a mi. out into the lake. Revenue from these operations has been the company's principal source of income to date. In addition to stock outstdg., R. T. Woodruff, v.p., was quoted in Dec. 1926, as stating the Co. had sold 125,000 shs. of the unissued stock at \$12 a share for delivery before May 30, 1927, and have granted an option on 250,000 shs. more to be exercised at the same time and at the same price from royalties and working interest for six months ended June 30, 1926, \$423,318; net after taxes, depletion, etc. \$178,007; net working capital, \$1,441,558; cash in bank, \$1,303,008; properties are listed at \$3,594,221; total assets, \$5,121,823. The company has no bonds outstanding.

**LAGO PETROLEUM CORP.**, 120 B'way, N. Y. Operating subsidiary of Lago Oil & Transport Corp., which is controlled by Pan-American Pet. & Transport Co., a sub. of Standard Oil Co. (Ind.) *Org. Del.* 1923 to exploit pet. possibilities of Maracaibo Lake bed, a shallow body of water cov. approx. 2,000,000 a. average depth of water being 30 ft. and extreme depth 70 ft. In May, 1924, the British Mexican Petroleum Co., Ltd., acquired controlling interest in Lago and organized Lago Oil & Transport Corp., Ltd., of Canada, as a marketing unit. In March, 1925, control of British Mexican Petroleum Co., Ltd., was acquired by Pan-American Petroleum & Transport which latter had previously been acquired by Standard of Indiana interests. The new owners sold British Mexican Pet. holdings in Great Britain to Anglo-American Oil Co. but retained the South American properties and the controlling interests in Lago. In Dec., 1925, the Standard interests formed a new Lago Oil & Transport Corp. under the laws of Delaware as a holding company for Lago Pet. Corp. Stockholders in Lago Pet. Corp. were offered the privilege of converting their shares into Lago Oil & Transport shares on a basis of one share of Lago Oil & Transport Class A stock for each two

shares of Lago Oil Corp. *Officers:* F. H. Wickett, chm.; Sir James T. Currie, pres.; Howland Bancroft, v.p. and g.m.; Jas. W. Stewart, A. N. Penn and R. G. Stewart, v.p.s.; O. D. Bennett, sec.; V. ## Oil and Gas Lease Forms

The PETROLEUM REGISTER presents herewith detailed forms of the most generally used leases in United States oil fields. They are published in this permanent record in response to numerous requests, and doubtless will be found of interest and value, not only for reference purposes, but for actual use, when the regularly printed forms are not available.

### "Mid-Continent 88" Oil and Gas Mining Lease

(Used Generally in Oklahoma and Kansas)

This Agreement, Entered into this the.....day of .....192....., between.....hereinafter called lessor, and.....hereinafter called lessee, does witness:

1. That lessor, for and in consideration of the sum of.....Dollars (\$.....), in hand paid, and of the covenants and agreements hereinafter contained to be performed by the lessee, has this day granted and leased and hereby grants, leases and lets unto the lessee for the purpose of mining and operating for and producing oil and gas, casinghead gas and casinghead gasoline, laying pipe lines, building tanks, storing oil, building powers, stations, telephone lines and other structures thereon to produce, save, take care of and manufacture all of such substances, and for housing and boarding employees, the following described tract of land in.....County, .....to-wit: .....in Section..... Township....., Range....., and containing.....acres, more or less.

2. This lease shall remain in force for a term of ten (10) years and as long thereafter as oil, gas, casinghead gas, casinghead gasoline or any of them is or can be produced.

3. The lessee shall deliver to the credit of the lessor as royalty, free of cost, in the pipe line to which lessee may connect its wells the equal one-eighth part of all oil produced and saved from the leased premises, or at the lessee's option, may pay to the lessor for such one-eighth royalty the market price for oil of like grade and gravity prevailing on the day such oil is run into the pipe line, or into storage tanks.

4. The lessee shall pay lessor, as royalty, one-eighth of the proceeds from the sale of the gas, as such, for gas from wells where gas only is found, and where not sold shall pay Fifty (\$50.00) Dollars per annum as royalty from each such well, and while such royalty is so paid such well shall be held to be a producing well under paragraph numbered two hereof. The lessor to have gas free of charge from any gas well on the leased premises for stoves and inside lights in the principal dwelling house on said land by making his own connections with the well, the use of said gas to be at the lessor's sole risk and expense. The lessee shall pay to lessor for gas produced from any oil well and used by the lessee for the manufacture of gasoline or any other product, as royalty, one-eighth of the market value of such gas. If said gas is sold by the lessee, then as royalty one-eighth of the proceeds of the sale thereof.

5. If operations for the drilling of a well for oil or gas are not commenced on said land on or before one year from this date, this lease shall terminate as to both parties, unless the lessee shall, on or before one year from this date, pay or tender to the lessor or for the lessor's credit in the.....Bank at.....

or its successors, which bank and its successors are the lessor's agent and shall continue as the depository of any and all sums payable under this lease, regardless of changes of ownership in said land or in the oil and gas, or in the rentals to accrue thereunder, the sum of.....

.....Dollars (\$.....) which shall operate a rental and cover the privilege of deferring the commencement of drilling operations for a period of one year. In like manner and upon like payments or tenders, the commencement of drilling operations may be further deferred for like periods successively. All payments or tenders may be made by check or draft of lessee or any assignee thereof, mailed or delivered on or before the rental paying date. Notwithstanding the death of the lessor, or his successor in interest, the payment or tender of rentals in the manner provided above shall be binding on the heirs, devisees, executors and administrators of such person.

6. If at any time prior to the discovery of oil or gas on this land and during the term of this lease, the lessee shall drill a dry hole, or holes, on this land, this lease shall not terminate, provided operations for the drilling of a well shall be commenced by the next ensuing rental paying date, or provided the lessee begins or resumes the payment of rentals in the manner and amount herein above provided; and in this event the preceding paragraphs hereof governing the payment of rentals and the manner and effect thereof shall continue in force.

7. In case said lessor owns a less interest in the above described land than the entire and undivided fee simple estate therein, then the royalties and rentals herein provided for shall be paid the said lessor only in the proportion which his interest bears to the whole and undivided fee.

8. The lessee shall have the right to use, free of cost, gas, oil and water found on said land for its operations thereon, except water from the wells of the lessor. When required by lessor, the lessee shall bury pipe lines below plow depth and shall pay for damage caused by its operations to growing crops on said land. No well shall be drilled nearer than 200 feet to the house or barn now on said premises without written consent of the lessor. Lessee shall have the right at any time during or after the expiration of this lease to remove all machinery, fixtures, houses, buildings and other structures placed on said premises, including the right to draw and remove all casing.

9. If the estate of either party hereto is assigned (and the privilege of assigning in whole or in part is expressly allowed), the covenants hereof shall extend to the heirs, executors, administrators, successors and assigns, but no change of ownership in the land or in the rentals or royalties shall be binding on the lessee until after notice to the lessee and it has been furnished with the written transfer or assignment or a certified copy thereof.

10. If the leased premises shall hereafter be owned in severalty or in separate tracts, the premises, nevertheless, shall be developed and operated as one lease and all royalties accruing hereunder shall be treated as an entirety and shall be divided among and paid to such separate owners in the proportion that the acreage owned by each such separate owner bears to the entire leased acreage. There shall be no obligation on the part of the lessee to offset wells on separate tracts into which the land covered by this lease may be hereafter divided by sale, devise, or otherwise, or to furnish separate measuring or receiving tanks. It is hereby agreed that, in the event this lease shall be assigned as to a part or as to parts of the above described lands, and the holder or owner of any such part or parts shall fail or make default in the payment of the proportionate part of the rent due from him or them, such default shall not operate to defeat or affect this lease in so far as it covers a part or parts of said land upon which the said lessee or any assignee hereof shall make due payment of said rentals. If at any time there

be as many as four parties entitled to rentals or royalties, lessee may withhold payments thereof unless and until all parties designate, in writing, in a recordable instrument to be filed with the lessee, a common agent to receive all payments due hereunder, and to execute division and transfer orders on behalf of said parties, and their respective successors in title.

11. Lessor hereby warrants and agrees to defend the title to the land herein described and agrees that the lessee, at its option, may pay and discharge any taxes, mortgages, or other liens existing, levied, or assessed on or against the above described lands and, in event it exercises such option, it shall be subrogated to the rights of any holder or holders thereof and may reimburse itself by applying to the discharge of any such mortgage, tax or other lien, any royalty or rentals accruing hereunder.

12. Notwithstanding anything in this lease contained to the contrary, it is expressly agreed that if lessee shall commence drilling operations at any time while this lease is in force, this lease shall remain in force and its term shall continue so long as such operations are prosecuted and, if production results therefrom, then as long as production continues.

13. If within the primary term of this lease production on the leased premises shall cease from any cause, this lease shall not terminate provided operations for the drilling of a well shall be commenced before or on the next ensuing rental paying date; or, provided lessee begins or resumes the payment of rentals in the manner and amount hereinbefore provided. If, after the expiration of the primary term of this lease, production on the leased premises shall cease from any cause, this lease shall not terminate provided lessee resumes operations for drilling a well within sixty (60) days from such cessation, and this lease shall remain in force during the prosecution of such operations and, if production results therefrom, then as long as production continues.

14. Lessee may at any time surrender this lease by delivery or mailing a release thereof to the lessor, or by placing a release thereof of record in the proper county.

15. It is agreed that this lease shall never be forfeited or cancelled for failure to perform in whole or in part any of its implied covenants, conditions, or stipulations until it shall have first been finally judicially determined that such failure exists, and after such final determination, lessee is given a reasonable time therefrom to comply with any such covenants, conditions, or stipulations.

16. This lease and all its terms, conditions, and stipulations shall extend to and be binding on all successors of said lessor or lessee.

In Witness Whereof, we sign the day and year first above written.

### "Producers 88 Special" Mineral Lease

(Used in the Gulf Coast of Texas)

This Agreement, entered into this.....day of....., 19...., by and between..... of..... County, State of....., hereinafter called Lessor (Whether one or more), and..... of..... County, State of....., hereinafter called Lessee, Witnesseth:

1. That Lessor, for and in consideration of the sum of..... (\$.....) Dollars, cash in hand paid, and of the covenants, agreements, and expenditures of money hereinafter contained to be performed or expended or which may hereafter be per-

formed or expended by Lessee upon the herein leased land, has this day Granted, Leased and Let, and does hereby Grant, Lease and Let unto Lessee the following described land situated in the State of..... County of..... Survey-League containing..... acres, more or less, and being.....

it being the intention of Lessor herein to include in the above description all lands, which Lessor may now own in said..... Survey-League, for the purpose and with the exclusive right of prospecting, drilling, mining and operating on and removing from said herein leased land, all oil, gas, sulphur and other minerals, which may be contained in or under said herein leased land; together with the exclusive right to erect and maintain thereon and remove therefrom all structures or equipment necessary or proper to facilitate or make possible the extraction, removal, transporting or marketing of said minerals. While this lease is in force, subject only to the royalties hereinafter reserved by Lessor, all of the oil, gas, sulphur and other minerals in and under said herein leased land, shall be the property of Lessee.

2. The royalties reserved by Lessor and which shall be paid by Lessee, are (a) on oil, a quantity equal to..... of all produced and saved, the same to be delivered either at the wells or to the credit of Lessor in the pipe line to which the wells may be connected, or may be purchased by Lessee at the price prevailing at that field at the time same is produced, (b) on natural gas, at the rate of One Hundred Dollars per annum, payable quarterly, for each well producing gas and which is used for operations other than on this lease or used for the manufacture of gasoline or being sold by Lessee, (c) on Sulphur, at the rate of Fifty Cents per long ton for all mined and marketed, (d) On all minerals other than oil, gas and sulphur..... of the net market value of same.

The Lessee shall have the free use of wood; also oil, gas and water produced by Lessee from said herein leased land for all purposes of development and operation on said herein leased land, and the royalty on oil or gas shall be in the net quantity saved after deducting any so used. Lessee shall have the right, either before or after the expiration of this lease, to remove any and all structure or equipment placed by him on said herein leased land.

3. If operations for the drilling of a well for oil, gas, sulphur, or other minerals, are not begun on said herein leased land on or before the.....day of....., 19...., this lease shall terminate as to all parties unless the Lessee on or before said date shall pay or tender for the credit of Lessor, in the..... Bank of..... or its successors, which bank and its successors are hereby constituted agent for Lessor, his successors, assigns, devisees, executor or administrator for the receipt of any and all sums of money payable under this lease and shall so continue regardless of any changes in the ownership of said herein leased land or of the oil, gas, sulphur or other minerals thereunder, or in the rentals or royalties which may accrue hereunder, the sum of..... (\$.....) Dollars which shall operate as rental and act as compensation for the privilege of deferring the commencement of operations for drilling for a period of..... months from said last above mentioned date. Thereafter, in like manner and upon like payments or tenders, the commencement of operations for drilling may be further deferred and this lease kept in force for like periods of time successively, but this lease can not be kept in force by said rental payments or tenders longer than..... years from said date last above mentioned in this paragraph; however, should Lessee be carrying on operations for drilling at the expiration of this..... year period of time, and oil not having previously been discovered in paying quantities, he shall be permitted to continue said operations even after said expiration date, provided that thereafter not more than sixty days elapse between the abandonment of one well until commencing operations for drilling the next well, and in the event Lessee or his assigns while carrying on drilling operations in this manner shall discover oil, gas, sulphur or other minerals in paying quantities, then such discovery shall be of the same effect as if same had taken place prior to the expiration of said above mentioned..... year period of time. Both operations for drilling and the payment of rentals shall not be required at the same time, and Lessee may alternate between operations for drilling and the payment of rentals, and shall pay rental only in proportion as the amount of time between the abandonment of operations for drilling and the end of the then current rental period bears to the entire rental period. All payments or tenders of all monies which may be payable under this lease may be made by check or draft of lessee or any assignee of his, mailed or delivered on or before the day same are due.

4. It is agreed and understood that any expenses incurred by Lessee upon the herein leased land, will have been incurred by Lessee pursuant to this lease being in full force and effect and is a consideration moving to Lessor for the execution of this lease and which consideration, together with those recited in paragraphs one, two and nine hereof shall be held to support and sustain, not only the privileges granted to first date written in paragraph three hereof, but also Lessor's option of extending this lease from time to time as set out in said paragraph three, as well as any and all other rights and privileges conferred on the Lessee by this instrument. The Lessee shall not be obligated against his wish or option to drill or otherwise carry on any operations hereunder, anything in this lease to the contrary notwithstanding.

5. If the lessee shall drill a well on the herein leased land and discover oil, gas, sulphur or other minerals in paying quantities, then this lease shall remain in full force and effect for a period of ten years from such discovery, and as long thereafter as oil, gas, sulphur or other minerals are produced in paying quantities or operations for drilling carried on by Lessee with not more than sixty days elapsing between the abandonment of one well and commencing operations for drilling the next well; provided further that Lessee shall at all times reasonably develop the herein leased land after the discovery of oil, gas, sulphur or other minerals on same; and having so discovered oil, gas, sulphur or other minerals in paying quantities the Lessee shall be exempt from loss or forfeiture of this lease in whole or in part, except after judicial ascertainment of forfeiture and a reasonable opportunity to save the lease after such ascertainment, or, at the election of the Lessee, to save each producing well, and have the lease remain in force to the extent of..... acres of land to be designated by Lessee surrounding each producing well.

6. When drilling or other operations are delayed or interrupted by some reason beyond the control of Lessee, such delay or interruption shall not be counted against Lessee. When requested by Lessor, Lessee shall bury its pipe lines so as not to interfere with cultivation and shall at all times pay Lessor for any damage to growing crops.

7. Lessor hereby warrants and agrees to defend the title to the lands herein leased and agrees that the Lessee, at its option, may pay and discharge any taxes, mortgages, or other liens existing, levied or assessed on or against the lands herein leased and, in the event he exercises such

option, he shall be subrogated to the rights of any holder or holders thereof and may reimburse himself by applying to the discharge of any such mortgage tax or other lien, any royalties or rentals accruing hereunder.

8. Should the interest owned by Lessor in said herein leased land prove to be less than the entire interest above mentioned, the royalties and monies herein provided for shall be delivered or paid to the Lessor, in the proportion only that the interest of Lessor bears to the interest above mentioned. If the estate of either party hereto be assigned—and the privilege of assigning in whole or in part is expressly conceded by each party to the other—the covenants hereof shall extend to the assigns and successive assigns; but no change or division in the ownership of the land or rentals or royalties, by purchase or otherwise, shall operate to enlarge the obligations or diminish the rights and privileges of the Lessee hereunder in any particular from what they would have been in the absence of such change or division, nor shall it be binding on the Lessee for any purpose until the Lessee shall have been furnished with proper evidence thereof. And if by partial assignment hereof or otherwise, this lease shall become the subject of plural ownership in severalty, then proportionate payments or tenders of rentals (in the manner heretofore provided for) corresponding to any such ownership may be made, and extensions thereby obtained to the extent of the acreage covered by said payment or tender of rental. Lessee may at any time surrender this lease or the lease upon any portion or parts of the lands herein described, and the obligations thereunder (including the payment of royalties or rentals on those parts or portions so released) shall be cancelled by placing a release thereof of said land or interest in said lands or any part thereof of record in the County where the above described lands are situated, and without in any way changing the rights or interests of Lessee in regard to those parts or portions of the herein leased land, which may not be included in said release.

9. If during the period of, or any extension of this lease and prior to the discovery of oil, gas or sulphur or other minerals in paying quantities on said herein leased land, there be drilled on adjacent land and within 200 feet of any line of the herein leased land, a well producing daily for 30 consecutive days as much as 100 barrels of oil acceptable in quality to pipe line companies, the Lessee will with reasonable diligence, begin and prosecute the drilling of a well on the herein leased land in a faithful effort to obtain a well producing oil in paying quantities on the herein leased land.

## Texas Oil, Gas and Mineral Lease

(Used particularly by major companies doing exploration work)

The State of Texas, }  
County of ..... }

hereinafter called "Grantor" (whether one or more), grants to ..... the exclusive right to explore the land hereinafter described for mineral indications, to drill and mine thereon for oil, gas, sulphur and other minerals, and to produce and appropriate any or all of same therefrom, also the right to use, free of charge, oil, gas and water from the land

in conducting operations thereon and in treating to make marketable the products therefrom, the right to remove from the land at any time any property placed by Grantee thereon, and all rights necessary to the full enjoyment of this grant; all, however, during the term and subject to the conditions hereinafter stated.

The land is in.....County, Texas, and is described as follows:

.....  
For the purpose of calculating the payments hereinafter provided for, the land is estimated to comprise.....acres, whether it actually comprises more or less. All land owned by Grantor in the above mentioned surveys is included herein, whether properly described above or not.

This grant shall terminate on....., 192...., and none of the provisions hereof shall be effective thereafter, unless, on or before such date, Grantee either: (1) notifies Grantor that he will drill a well on the land, in which event Grantee shall begin operations therefor within sixty (60) days from such date and shall drill such well with reasonable diligence to completion or abandonment in an honest effort to discover minerals in paying quantities; or, (2) pays Grantor..... Dollars (\$.....) per acre for all or that part of the land which Grantee elects to continue to hold hereunder, surrendering at the same time any balance, which payment shall maintain Grantee's rights in effect without any operations for one year from the date above mentioned; and Grantee may maintain his rights in effect without any operation for successive six-months' periods, aggregating four (4) additional years, by paying Grantor, on or before the beginning of such respective periods..... Dollars (\$.....) per acre for all or that part of the land which Grantee has elected to continue to hold hereunder. The notice may be given to Grantor personally or by mailing at Houston, Texas, on or before the due date of the notice, letter addressed to Grantor at .....; the payments may be made to Grantor personally or by mailing at Houston, Texas, on or before the due date of the payment, letter addressed to the..... Bank of..... or its successor), transmitting Grantee's check with instructions to such bank to deposit same to Grantor's credit; such bank being hereby constituted Grantor's agent.

If, prior to discovery of oil on the land, a well producing as much as two hundred (200) barrels of oil per day for thirty (30) consecutive days is brought in on adjacent land and within two hundred (200) feet of any line of land, then held hereunder, Grantee shall with reasonable promptness begin and with reasonable diligence prosecute the drilling of a well on the land, then held hereunder, in an honest effort to discover oil in paying quantities.

After beginning operations on the land and prior to discovering any mineral in paying quantities thereon, Grantee may maintain his rights in effect for so long as he pleases by continuing such operations without lapse of more than sixty (60) days between cessation of operation on one well and the beginning of operations for drilling another; during the period of five (5) years from the date above mentioned Grantee may cease such operations and nevertheless maintain his rights in effect by beginning or resuming the payments above provided for—making, within sixty (60) days from such cessation the payment for the current period which must have been made in order to maintain his rights in effect without any operations.

After discovering any mineral in paying quantities on the land, Grantee may maintain his rights in effect for so long as he pleases by proceeding with reasonable diligence to develop the land; however, the only penalty for Grantee's failure so to develop shall be loss of his rights; and Grantee may, if he so elects, at any time after discovering any mineral in paying quantities on the land, surrender any part thereof, when after none of the provisions hereof shall be effective as to the surrendered part, but Grantee may continue to hold the unsundered part by complying with the provisions hereof as to the unsundered part.

Grantor shall be entitled to the following royalties: One-eighth ( $\frac{1}{8}$ ) of the oil produced and saved and not used for fuel in conducting operations on the land or in treating to make marketable the products therefrom; one-eighth ( $\frac{1}{8}$ ) of the net profits realized on the natural gas produced and saved; one-eighth ( $\frac{1}{8}$ ) of the value (at the rate of four cents per thousand cubic feet of the casinghead gas used for the manufacture of casinghead gasoline; fifty cents (50c) for each ton (2,240 pounds) of sulphur marketed; and a reasonable royalty on any other mineral produced and saved. These royalties are based on ownership by Grantor of the entirety of the land; if Grantor owns less than the entirety, the royalties shall be proportionately decreased. The oil royalty shall be delivered to Grantor, free of expense, at Grantor's option either at the well or to Grantor's credit into any pipe line connected with the well.

The use of the surface of the land is granted only for the purposes hereof. Grantee shall be responsible for all damages caused by his explorations for mineral indications.

All provisions hereof shall extend to and bind the successor and assigns (in whole or, to that extent, in part) of the parties hereto, respectively; but no change in ownership of the land or part thereof, the minerals or interest therein, shall impose any additional burden on Grantee or impair the effectiveness of any payment made as above provided.

Grantor acknowledges receipt of..... Dollars (\$.....), paid by Grantee, as the full and adequate consideration for every right granted herein.

Should Grantee not have completed such preliminary exploration as he desires to make before..... then by the payment or deposit as aforesaid before said date of the sum of \$..... this date and all subsequent rental dates herein shall thereupon be extended for six months respectively.

hereinafter called "Grantor" (whether one or more), grants to..... hereinafter called "Grantee," the exclusive right to explore the land hereinafter described for mineral indications, to drill and mine thereon for oil, gas, sulphur and other minerals, and to produce and appropriate any or all of same therefrom, also the right to use, free of charge, oil, gas and water from the land in conducting operations thereon and in treating to make marketable the products therefrom, the right to remove from the land at any time any property placed by Grantee thereon, and all rights necessary to the full enjoyment of this grant; all, however, during the term and subject to the conditions hereinafter stated.

The land is in..... Parish, Louisiana, and is described as follows:

For the purpose of calculating the payments hereinafter provided for, the land is estimated to comprise..... acres, whether it actually comprises more or less. All land owned by Grantor in the above mentioned sections is included herein, whether properly described above or not.

This grant shall terminate on....., 192...., and none of the provisions hereof shall be effective thereafter, unless, on or before such date, Grantee either: (1) notifies Grantor that he will drill a well on the land, in which event Grantee shall begin operations therefor within sixty (60) days from such date and shall drill such well with reasonable diligence to completion or abandonment in an honest effort to discover minerals in paying quantities; or, (2) pays Grantor ..... Dollars (\$.....) per acre for all or that part of the land which Grantee elects to continue to hold hereunder, surrendering at the same time any balance, which payment shall maintain Grantee's rights in effect without any operations for one year from the date above mentioned; and Grantee may maintain his rights in effect without any operations for successive six-months' periods, aggregating four (4) additional years, by paying Grantor, on or before the beginning of such respective periods, ..... Dollars (\$.....) per acre for all or that part of the land which Grantee has elected to continue to hold hereunder. The notice may be given to Grantor personally or by mailing at Houston, Texas, on or before the due date of the notice, letter addressed to Grantor at .....; the payments may be made to Grantor personally or by mailing at Houston, Texas, on or before the due date of the payment, letter addressed to the ..... Bank of..... (or its successor), transmitting Grantee's check with instructions to such bank to deposit same to Grantor's credit; such bank being hereby constituted Grantor's agent.

If, prior to discovery of oil on the land, a well producing as much as two hundred (200) barrels of oil per day for thirty (30) consecutive days is brought in on adjacent land and within two hundred (200) feet

of any line of land, then held hereunder, Grantee shall with reasonable promptness begin and with reasonable diligence prosecute the drilling of a well on the land, then held hereunder, in an honest effort to discover oil in paying quantities.

After beginning operations on the land and prior to discovering any mineral in paying quantities thereon, Grantee may maintain his rights in effect for so long as he pleases by continuing such operations without lapse of more than sixty (60) days between cessation of operations on one well and the beginning of operations for drilling another; during the period of five (5) years from the date above mentioned Grantee may cease such operations and nevertheless maintain his rights in effect by beginning or resuming the payments above provided for—making, within sixty (60) days from such cessation the payment for the current period which must have been made in order to maintain his rights in effect without any operations.

After discovering any mineral in paying quantities on the land, Grantee may maintain his rights in effect for so long as he pleases by proceeding with reasonable diligence to develop the land; however, the only penalty for Grantee's failure so to develop shall be loss of his rights; and Grantee may, if he so elects, at any time after discovering any mineral in paying quantities on the land, surrender any part thereof, when after none of the provisions hereof shall be effective as to the surrendered part, but Grantee may continue to hold the unsundered part by complying with the provisions hereof as to the unsundered part.

Grantor shall be entitled to the following royalties: One-eighth ( $\frac{1}{8}$ ) of the oil produced and saved and not used for fuel in conducting operations on the land or in treating to make marketable the products therefrom; one-eighth ( $\frac{1}{8}$ ) of the net profits realized on the natural gas produced and saved; one-eighth ( $\frac{1}{8}$ ) of the value (at the rate of four cents per thousand cubic feet) of the casinghead gas used for the manufacture of casinghead gasoline; fifty cents (50c) for each ton (2,240 pounds) of sulphur marketed; and a reasonable royalty on any other mineral produced and saved. These royalties are based on ownership by Grantor of the entirety of the land; if Grantor owns less than the entirety, the royalties shall be proportionately decreased. \*Including Alaska, Michigan and Missouri production, estimated at 10,300 bbls. in 1917 and 7,943 in 1918.

\*Includes production of Oklahoma. \*Included with Kansas. \*Estimated.

\*No production in Missouri; Michigan included in Ohio. \*Includes production of Alaska, Michigan and New Mexico.

\*1924 Total includes 13,000 bbls. produced in Alaska and Utah. Arkansas, 1921—10,190,000 bbls.; 1922—12,712,000; 1923—36,610,000; 1924—46,028,000; 1925—74,749,000; 1926—59,229,000; New Mexico, 1924—

98,000; 1925—976,000 bbls.; 1926—1,627,000; Michigan, 1926—98,000.

\*Includes small production of Alaska.

# Monthly Crude Production by States, January to December, 1926, Inclusive

(Preliminary figures of U. S. Bureau of Mines in thousands of bbls. of 42 U. S. gallons)

Petroleum transported from producing properties. Final figures will include petroleum consumed on the leases and produced but not transported from producing properties, which items for the past few years have amounted to approximately one per cent of the total.

## Summary of Petroleum Statistics for 1926

From the report of G. R. HOPKINS, *Petroleum Economist*.

Bureau of Mines, U. S. Department of Commerce.

The Bureau of Mines, Department of Commerce, estimates 766,504,000 barrels of petroleum were produced and transported from producing properties in the United States during 1926. Final production figures, which will include the quantity of petroleum consumed for fuel on the leases and the net change for the year of stocks held on producing properties, obtained from the annual canvass of producers, may show a total for the year of approximately 773,000,000 barrels. This constitutes the highest production ever recorded and is an increase over the previous record figure, that for 1925, of 1.2 per cent.

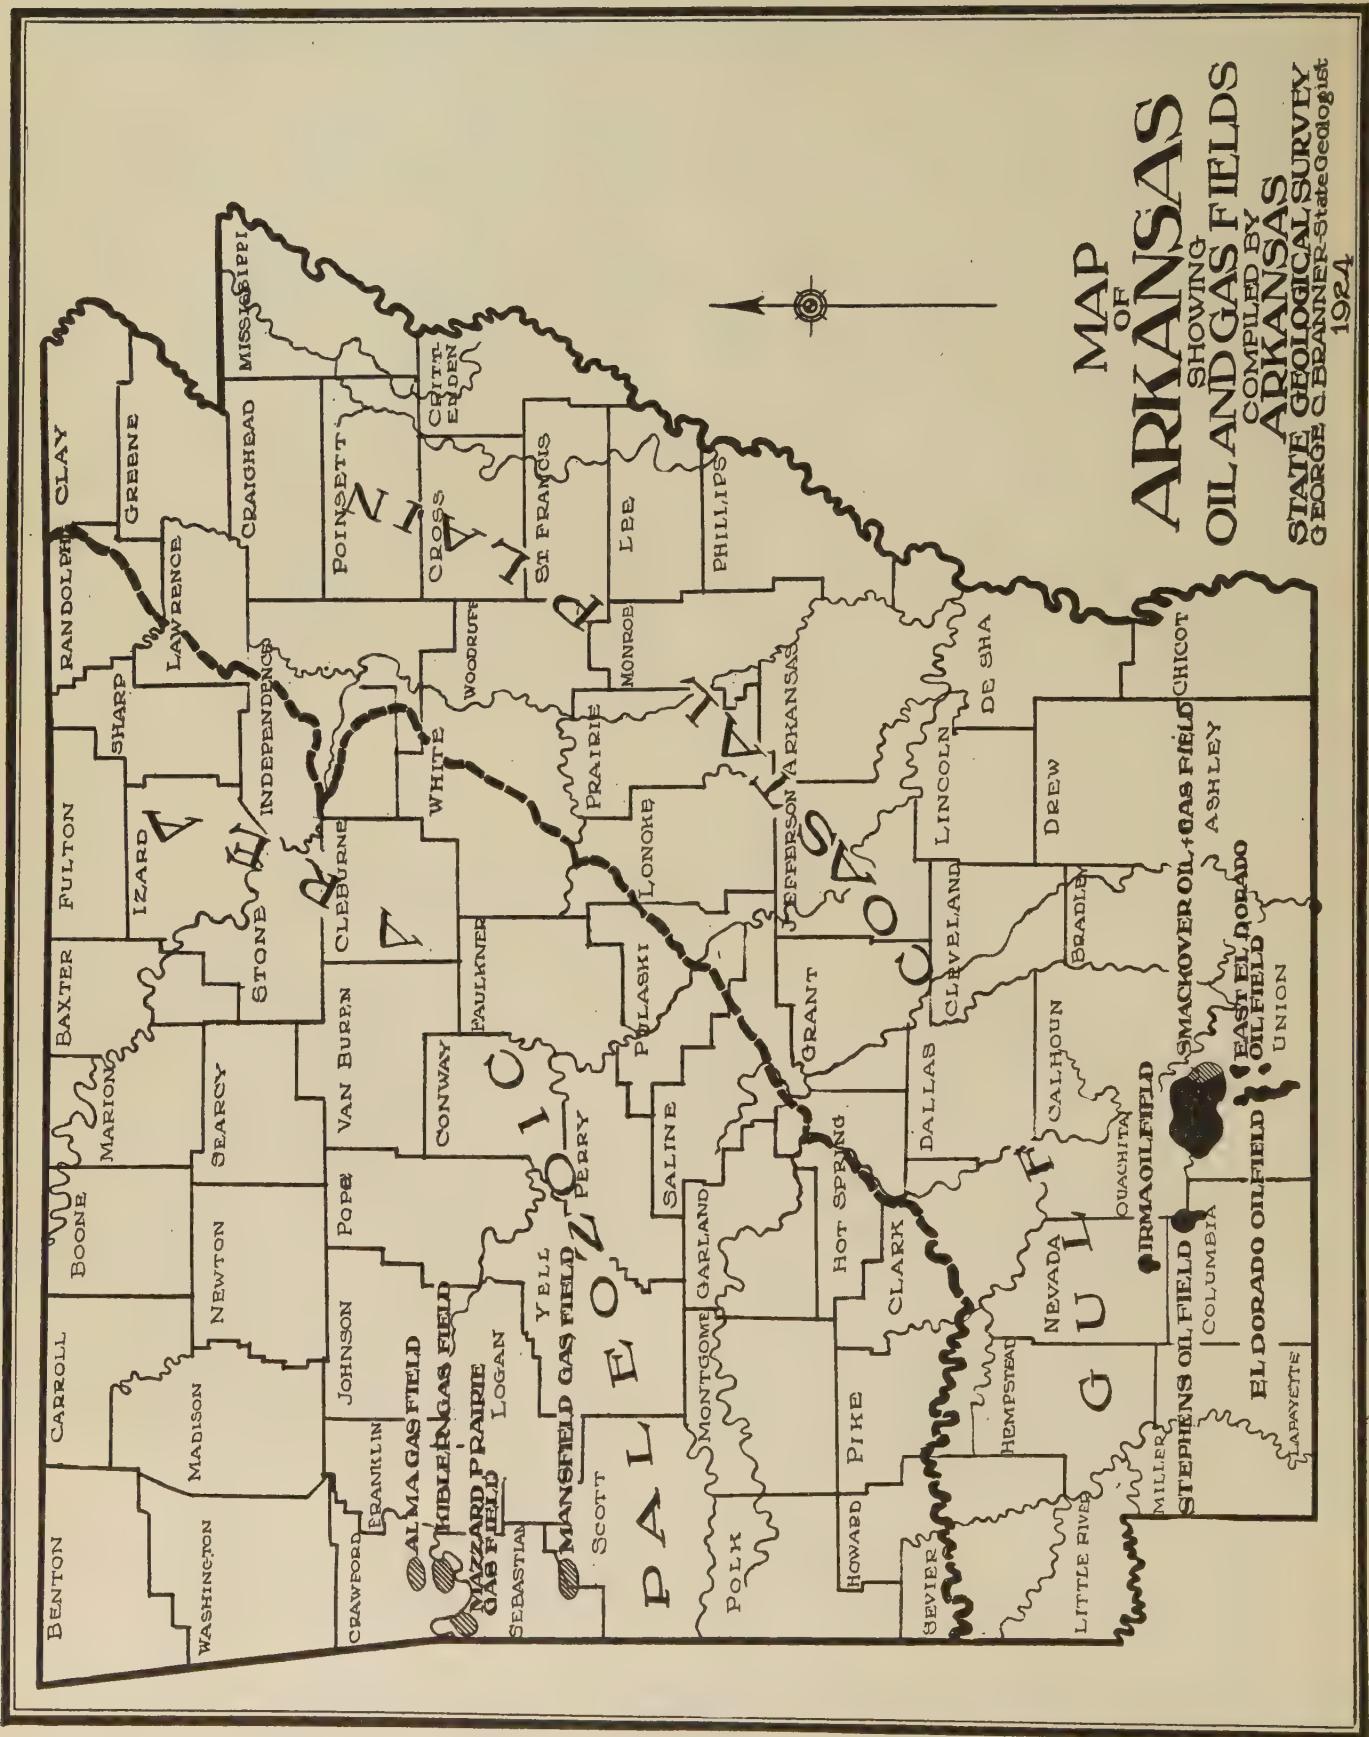

The year opened with a daily average production considerably below the 1925 average but closed with new records being established almost daily. The daily average production of December, 2,325,000 barrels, an increase over January of 21 per cent.

The increase of 1926 over 1925 did not result from an increase in the Mid-Continent or California fields which, together, produced 84 per cent of the total output, but was due to increased output in the Gulf coast area. Production continued to rise in the Appalachian area, where success in the use of new recovery methods served as a general stimulating influence. The Rocky Mountain area checked its declining output by virtue of a million-barrel gain for the year.

The discovery and development of the Seminole field in Seminole County, Oklahoma, was the most important event of the year. The achievements of the Panhandle field in Texas was the largest single factor in the increase in total production. The most important feature of the year in California was the discovery of the Seal Beach field. The Sunburst field occupied the center of the stage in the Rocky Mountain area. The development of the deep-sand zones of Spindletop constituted the most important occurrence in the coastal area. In the Balcones fault zone of Texas, one small field, Nigger Creek, was discovered. West Texas was again the scene of much exploratory work and several new fields were discovered. In the Louisiana-Arkansas area nothing occurred to compensate the decline at Smackover, though the shallow Urania pool threatened for a time to become a major factor.

Of the total production in 1926, 629,462,000 barrels, or 82 per cent, was light crude of 24° A. P. I. and above, and 137,042,000 barrels, or 18 per cent, heavy crude, of gravity below 24° A. P. I. In comparison with 1925 this indicates an increase in the proportion of light crude produced.

## OIL WELL PUMP GEAR UNITS

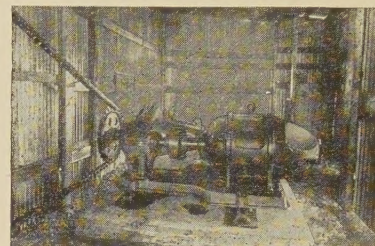

*A complete line of single and double reduction pump gear units for all standard oil field motors and all oil field services*

**OP-2, 15-35 h.p. Pumping Unit**

### Single Reduction Units

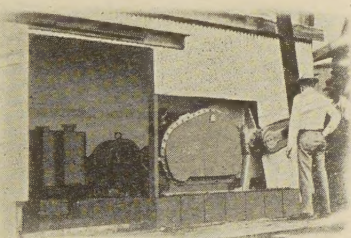

These units are designed for oil well pumping, swabbing, bailing, and pulling rods and tubing. They operate in the manner illustrated, tho a belt may be substituted for the chain, driving direct from the slow speed shaft of the unit to the band wheel, giving a positive drive between the motor and the band wheel. This setup has a *very much higher efficiency* than any counter shaft arrangement; and greatly reduces production interruptions due to belt failure and similar mechanical difficulties.

**OP-4, 25-65 h.p. Unit in Service**

### Ratings—Single Reduction Units

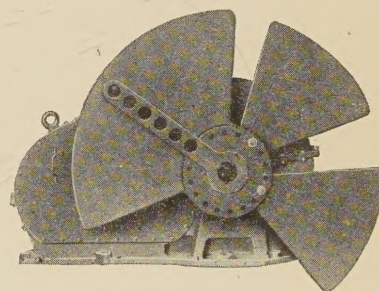

Unit	Max. Motor Horse power	Ratio	Remarks
OP-2	15-35	5.01-1	Anti friction bearings, herringbone gears.
OP-4	25-65	4.95-1	
OP-5	125	4.95-1	For electric drilling.
OP-6	15-35	5.06-1	Helical gears—Timken bearings.

**OP-12 Pumping in Oklahoma**

### [Double Reduction Units

Nuttall double reduction units are *the most efficient form* of pumping drive ever developed. The standard pitman connects direct to the unit crank, eliminating the band wheel and all attendant chains and belting. They are the only gear units having the "*change gear*" feature, which allows the pumping speed to be easily varied without disturbing the case or the shaft connections. Speeds can be thus regulated and the motor can operate at the most efficient speed at all times. All gears are BP "*tough-hard*" with ground teeth. The Nuttall Counterbalanced crank relieves the load of the sucker rods on the gear unit and gives a smooth, even operation.

**OP-11 with Counterbalance**

### Ratings—Double Reduction Units

Unit	Max. Motor Horse power	Ratio	Remarks
OP-11	20-50	Variable	Can also be used with multi cylinder oil or gas engines.
OP-12	25-65	"	Can also be used with single cylinder gas engine.
OP-13	20-50	"	Conforms to 7 ft. 6 in. A. P. I. rig iron std.
OP-15	20-50	"	Conforms to 5 ft. 6 in. A. P. I. rig iron std.
OP-14	25-65	"	Conforms to 7 ft. 6 in. A. P. I. rig iron std.
OP-16	25-65	"	Conforms to 5 ft. 6 in. A. P. I. rig iron std.

**HILD DIFFERENTIAL DRIVE**—The Nuttall Company manufactures this drive for the Oil Well Supply Co. and no small share of its phenomenal success is due to the excellence of the Nuttall BP "*tough-hard*" gears which are a part of its construction.
